Education

University of Notre Dame , Notre Dame, IN	August 2017 - May 2021
- Bachelor of Business Administration in Finance 2020 Spring Semester Dean's List in Mendoza College of Business	3.4 cumulative GPA
University of Notre Dame – Mendoza Graduate School , Notre Dame, IN	June 2023 – May 2024
Master of Science in Business Analytics – Sports Analytics concentration	3.95 cumulative GPA

Work Experience

Levin & Brend PC , Client Data Analyst (Forensic Accounting & Business Valuation)	May 2018-Present
- Performed asset-based business valuations for marital estate, divorce litigation, and shareholder dispute cases, analyzing balance sheets and asset/liability structures to determine fair market value - Analyzed financial statements in R/Python to uncover trends in income, spending, and distributions for mediations - Built classification models in R to separate personal from business expenses across client financials, helping improve valuation accuracy and reduce manual review time - Pulled and cleaned financial data and QuickBooks/Quicken to develop report schedules for valuation findings	
CourtViz , CEO, Founder & Data Scientist	https://court-viz.vercel.app/ June 2025 – Present
- Built a full-stack NBA analytics website using Next.js, Supabase, and Python, featuring interactive player profile pages with advanced metrics and contextual percentile visualizations - Engineered a fully automated ETL pipeline that ingests and refreshes player statistics daily from the NBA API into Supabase, ensuring real-time data accuracy across the platform	
Tampa Bay Rays , Baseball Technology Operator	March 2022- October 2023
- Operated HawkEye and KinaTrax systems during games to ensure motion capture and event data collection - Executed data validation and post-game processing pipelines, integrating contextualized and uncontextualized HawkEye feeds into structured datasets. - Developed and deployed ML regression models on Statcast batted-ball data to identify undervalued hitters	
Varsity Baseball Student Manager – University of Notre Dame	September 2017- July 2021
- Recorded and integrated practice/game data from RVP, Rapsodo, Edgertronic, Trackman, and Synergy into centralized databases for advanced analysis. - Developed Tableau dashboards that visualized pitching/hitting trends, supporting coaches in player development. - Produced data-driven scouting reports by combining Trackman pitch metrics with Synergy video tagging to evaluate opposing pitchers' arsenals and hitter tendencies.	
Chicago Mercantile Exchange Group , Corporate Procurement Internship	June 2020-August 2020
- Conducted data-driven market research on CME derivatives and futures - Linked and cleaned 7,000+ supplier records in Workday/Excel, standardizing data for analytics and reporting. - Managed and organized supplier records in Workday and Jira databases for streamlined procurement tracking	

Skills

NBA Tracking Data Injury Prevention Project	https://github.com/bpapiernik/NBA-Player-Tracking-Injury-Project
- Develop an XGBoost model to analyze NBA player movements and play-by-play usage metrics to improve injury prevention and load management strategies - Integrate and analyze the vast data sources: NBA 2D player tracking data spanned 111 million rows over 632 games - Identify key variables affecting player injuries and provide insights for adjusting training methods	
CBB Game Outcome Probabilities Model	https://github.com/bpapiernik/CBB-Game-Probabilities
- Developed an XGBoost model using Torvik team metrics, EvanMiya Bayesian Performance Ratings, and ShotQuality data from the top 8 players of each NCAA tournament team over the past 5 years - Utilized a dataset of game with matchup-level differential features to train the model and run 100,000 simulations - Leveraged the model to predict NCAA game outcomes and tournament win probabilities	
Heliocentric Decision-Making Model	https://github.com/bpapiernik/Heliocentric-Snapshot-Model
- Conduct an analysis on NBA shot selection by modeling expected points with spatial features to evaluate decision-making efficiency - Utilize XGBoost to estimate shooter and teammate outcomes for identifying opportunity cost and creation value - Develop predictive metrics and a Heliocentric Leaderboard to enhance player evaluation and scouting	

Proficient in SQL, Python, Rstudio, QuickBooks, VBA, Tableau, AWS cloud services,

Interests: Sports Management, Business side of sports, Coaching, High school sports, Chess
